TAG Smart Technology

All In One Digital Teaching System

TAG´s All In One Digital Teaching System is all-in-one multimedia PC solution which provides ease of operating & controlling smart digital classrooms through single control-panel.

This all in one digital teaching system solution consists of aluminum cabinet with storage and control compartment where smart classroom computer, document camera, speakers, amplifier, keyboard, mouse etc. are in-built.

This entire setup is lockable with key to make these smart digital classroom equipment safe and secure. This smart cabinet console can be wall mounted along side smart interactive whiteboard to make entire setup look professional and provide ease of operation to teachers
